Dengue classification by epidemiological week 2015

ABSTRACT

This document represents statistical data for the entire country of Belize, on Dengue classification by Epidemiological (EPI) Week for the year 2015. The data signify Confirmed, Probable, Suspected (clinical) and Suspected (by test) cases of Dengue for all of Belize. The data are further broken down by district, sex and age. All the data in question relate to EPI Week 52

* Dengue Episode: Is a group of Dengue Events; a Dengue Event occurring within 49 days of a previous event is considered within the same episode. A Dengue Event occurring more than 49 days after a previous event initiates a new Dengue Episode. A patient can have multiple Dengue Episodes during lifetime. Each Episode Groups all the Clinical Diagnosis, Request, and results made for each episode.

Dengue Classification By Epidemiological Week 2015					
Epidemiological Week	Classification				Grand Total
	Confirmed	Probable	Suspected (Clinical)	Suspected (by Test)
